Beyond these giants, e-commerce platforms like Shopify have democratized the use of digital currency by making it simple for millions of small and medium-sized businesses to include a cryptocurrency checkout option.

But it came around the same time that Bitcoin advocate and Jan3 founder Samson Mow said that Ethereum investors would switch back to Bitcoin once ETH prices

were high enough.

The stated objective for the models is to maximize their risk-adjusted returns. The rules emphasize autonomy, requiring each AI to independently generate its trading ideas, size and time its trades, and manage its own risk, with all model outputs and corresponding trades made public for transparency.

SearchGPT is the latest development in what appears to be a new era in web search, which The Verge's Nilay Patel has termed "Google Zero." This approach prioritizes practicality over variety: instead of presenting a list with different sources and approaches to a specific query, which encourages users to do their own research, AI-powered search engines opt for a more direct tactic, providing concise, summarized information responding exactly to what users are looking for.
