It's worth noting that Armbrust was mining at a time when Ethereum still relied on a proof-of-work system, which demanded significant computing power and energy use, before its transition to proof-of-stake in September 2022.

Cross-border payment is one of the important application scenarios of blockchain technology. The traditional cross-border payment process is complex, involving

multiple intermediaries, with long settlement time and high fees. In contrast, cross-border payments based on blockchain technology can realize direct peer-to-peer transactions, greatly simplifying the process, shortening settlement time, and reducing costs. Currently, several countries and financial institutions have begun to try using blockchain technology for cross-border payments. With the continuous maturity of technology and the improvement of regulatory frameworks, blockchain cross-border payments are expected to become the mainstream cross-border payment method in the future.

Strategy shares rose 5.3% to \$305, according to Yahoo Finance. Although the firm's stock price has dropped 11.5% over the past month, its initial move on Monday lifted it into positive territory on the year, with shares up slightly from \$300 in January.

Ether options' 25-delta skew surged to 14% on Thursday, a level rarely sustained and often linked to periods of heightened fear. Traders are paying a premium for put (sell) options, signaling that market makers remain uneasy about downside risks. Under normal market conditions, the skew typically fluctuates between -6% and +6%.
