Grok 4 predicts crypto market bottom, flips shorts to longs for 500% gain

With the rise of AI, charts that integrate onchain data, such as wallet activity and total value locked (TVL), are becoming increasingly popular. These advanced charts give traders deeper insights into evolving market dynamics.

Details about how the firm will fund the initiative were not revealed, but it expects to make the first strategic purchase “in the near future.”

However, he emphasized that it is still a “working theory” and that he remains a Bitcoin bull.

Cointelegraph reached out to Paradigm for comment, but did not hear back by the time of writing.

The comments follow Babylon's release of a white paper in early August, outlining what it calls a Bitcoin trustless vault system. The system leverages the Bitcoin smart contract verification system BitVM3 to lock BTC in per-user vaults, where withdrawals (redemption or liquidation) are gated by cryptographic proofs of external smart contract state verified on Bitcoin.
