"The elephant in the room is are DATs really justified?" Chu questioned, noting "without a credible business case, rigorous governance, robust custody, and transparent risk controls, such DAT structures can become misaligned with shareholder interests and could invite the kind of liquidity and governance risks regulators worry about."

The stated objective for the models is to maximize their risk-adjusted returns. The rules emphasize autonomy, requiring each AI to independently generate its trading ideas, size and time its trades, and manage its own risk, with all model outputs and corresponding trades made public for transparency.

Galaxy disclosed \$28.4 million in third-quarter revenue, a 231% increase from the same period a year ago. The firm also said that trading volumes increased 140% quarter-over-quarter, which includes a \$9 billion notional Bitcoin sale that Galaxy facilitated earlier this year.

DCA provides exactly that: You set the asset, amount and frequency, then let the schedule handle the rest. The result is steady exposure without the pressure to react to every market swing.

“Dankrad leaving Ethereum is a terrible look for open-source vs. corporate blockchains,” Andy, co-host of The Rollup, a popular crypto-focused podcast, said. “Huge L for the entire community.”

The restrictions also limit the type of compensation or rewards offered to consumers to persuade them to use a particular exchange or service.
