But branching out into AI data centers is difficult, requiring more complex heating, ventilation, and air conditioning systems than those for Bitcoin mining, experts have told Decrypt.

By offering regulated and user-friendly investment products, Grayscale allows investors to gain exposure to cryptocurrencies without the challenges of managing wallets, operating nodes or dealing with validator risks. Through staking-enabled offerings like the Grayscale Ethereum Trust (ETHE) and Grayscale Solana Trust (GSOL), Grayscale has integrated the yield-generating features of blockchain

networks with the regulatory and custodial standards of traditional finance.

“We can build, or architect, or code cyberspace to protect values that we believe are fundamental. Or we can build, or architect, or code cyberspace to allow those values to disappear. There is no middle ground. There is no choice that does not include some kind of building. Code is never found; it is only ever made, and only ever made by us.”
