Comprehensive Guide to que es la billetera spot en binance

The data analytics platform also showed that in the last 30 days, BNB Chain's successful transactions reached 500 million, a 151% surge from the previous 30-day period. This puts the network second to Solana, which holds the top spot for transactions.

Although Galaxy's business focuses on financial services and asset management, the company is also engaged in data center infrastructure. The firm said it remained on schedule to deliver power to Al cloud computing platform CoreWeave in the first half of next year.

The cumulative total net inflow in spot Bitcoin ETFs now stands at \$61.50 billion, with total net assets slipping to \$149.66 billion, or about 6.76% of Bitcoin's market capitalization.

But the second problem with the code-is-law idea is more damning. While the model of regulation suggested here so far has been of a reactive system that arises to fill the need for authority, some political scientists — realists — view it the other way.

"Ethereum could flip Bitcoin similar to how Wall Street and equities flipped gold post 71," Lee said in an interview with ARK Invest CEO Cathie Wood on Thursday.

Canaan closed about 28% higher by mid-afternoon. CleanSpark, which on Monday announced that it would become the latest publicly traded miner to pivot resources to artificial intelligence-focused projects, was up roughly 4.5%.
