Decentralized applications (DApps) are changing the way we interact with the Internet. Unlike traditional applications, DApps run on blockchain networks, do not rely on centralized servers, and feature decentralization, openness, and

immutability. Currently, DApps are mainly concentrated in games, finance, social media, and other fields, providing users with brand new experiences. Although the development of DApps still faces challenges such as user experience, performance, and scalability, with the continuous advancement of technology, we believe that DApps will become an important part of the future Internet.

SolvBTC keeps every token fully backed by Bitcoin, stored with regulated custodians, and verified on-chain for transparency. Its use by a Nasdaq-listed company is a gesture of “trust from traditional finance,” Chow added.

Miners typically rely on the price of Bitcoin to go up to cover costs but continued volatility for the asset has spurred some large miners to branch into high-powered computing.
