How has it worked out? During the late-2024-to-mid-2025 rally, media estimates pointed to unrealized gains of \$300 million by December 2024, rising to portfolio values north of \$700 million months later, implying hundreds of millions in profit at peak. Figures move with price, but the pattern was clear in that upswing: Disciplined buying built a meaningful position.

Uniswap added support for the Solana network to its web app, allowing Solana users to link their wallet and trade Solana-based tokens alongside those from other networks.

In the film, this is an argument based on moral intuition alone, without a principled basis and defended only by tautology. None of the ideas' advocates make the normative case for why code should be law, but there must be an instrumental basis for this philosophy beyond moralism.

ETF inflows must return and new ETH buyers must step in for the bulls to have a shot at getting back to \$5,000.

Mt. Gox Bitcoin repayments begin

"In practical terms, this means HIVE is scaling production of Bitcoin much like a growth business scales output of a core product," he wrote. "Each incremental exahash increases daily production and revenue potential, while our HPC division provides a complementary revenue stream that grows with demand for compute power. "
