The Average Directional Index, or ADX, sits at 33, well above the critical 25 threshold that confirms a strong trending market. Think of ADX as your “trend strength meter”—it doesn’t care about direction, just whether a real trend exists. Below 20, you’re in choppy waters where false breakouts are common. Above 25, you’ve got momentum. At 33, BNB is firmly in trending territory, meaning institutions and retail are moving in the same direction, creating sustained buying pressure that can carry prices significantly higher.

The emergence of smart contracts has brought revolutionary breakthroughs to blockchain technology. These self-executing computer programs can automatically

trigger corresponding operations when preset conditions are met, without manual intervention. Smart contracts not only improve transaction efficiency but also greatly reduce trust costs. Currently, smart contracts have been widely applied in decentralized finance (DeFi), digital identity authentication, the Internet of Things, and other fields. With the continuous development of technology, the functions of smart contracts will become more powerful, and application scenarios will become more abundant.

Modern encryption key lengths range anywhere from 2,048 to 4,096 bits, with current quantum computers only able to break keys of about 22 bits in size or less, Mental Outlaw said.

At the time, FalconX stated that its FTX exposure did not affect client funds or any ongoing operations. The original link to the statement has since disappeared from its website.

For analyst Alex Wacy, gold's pullback is similar to its 2020 peak that coincided with a local Bitcoin bottom. The question now is whether gold will once again mark the bullish reversal for BTC.

In April, Google joined Meta, OpenAI, and other generative AI developers in pledging to enforce guardrails that would keep their respective AI models from generating child sexual abuse material (CSAM).
