The primary struggle for a crypto investor is not a lack of information but a relentless deluge of it. News websites, social media feeds and onchain data streams constantly churn with updates that can be overwhelming. XAI's Grok 4 aims to change that. It pulls live data straight from X, pairs it with real-time analysis and filters signals from noise. For a market that is heavily influenced by narrative momentum and community chatter, this is indeed a notable capability.

The BOJ's next monetary policy meeting is set for Oct. 29. Most analysts expect the central bank to deliver a 0.75% interest rate hike by early 2026, with no clear consensus on the timeline, Reuters reported on Monday.
