Mitchnick told Bloomberg that many early adopters now prefer the convenience of managing their holdings through established financial institutions while retaining exposure to Bitcoin's price movements.

Big Tech firms have also been supportive: Microsoft accepts BTC directly or through processors, whereas Newegg also supports ETH for purchases on-site, and Overstock welcomes XRP as well. AMC Theatres accepts Bitcoin and other digital assets for its products and services, from Xbox content to movie tickets.

The innovation of the Ethereum platform lies in that it is not only a cryptocurrency but also a decentralized computing platform. Ethereum supports the development and execution of smart contracts, providing a runtime environment for decentralized applications (DApps). The emergence of Ethereum has greatly expanded the application scope of blockchain technology, giving birth to numerous innovative projects. In recent years, the Ethereum network has also been continuously upgraded and improved, such as the launch of Ethereum 2.0, which aims to solve the problems of network congestion and high energy consumption and improve the scalability of the system.
