Comprehensive Guide to stop loss limit order binance

BTC's current price action closely resembles the March–April bottom range, when sharp intra-day wicks cleared out liquidity built over 30 days before a gradual recovery began. The pattern suggested that BTC could retest the \$100,000 range without necessarily breaking the broader bullish structure, unless it falls decisively below that level.

Both bills pursue identical goals as they require crypto mining companies to pay into New York's Energy Affordability Programs based on their electricity consumption.

The top banking regulator in the U.S. dismissed fears that stablecoins could trigger a sudden deposit crisis, urging community banks to view the digital assets as tools for competing with Wall Street giants rather than existential threats.

“From what we’ve seen, audiences aren’t interested in watching computer-generated content untethered from the human experience,” they said.
