Ryan Sean Adams, another prominent crypto influencer and noted Ethereum backer, joked that Friday's news did not break his faith in the decentralization-focused network—but that such a day could come soon.

In a post on Sunday, the Ethereum core dev, who goes by "Fede's intern" on X, argued that while Paradigm has "created valuable things for the community," he is worried about the growing influence of a venture fund whose ultimate goals are driven by profit and influence.

Treasury initially published the request in the Federal Register in August.

"The number of new packages that get published on a daily basis is posing a challenge for security organizations, and ML model-based detection is currently the best answer that the security industry can provide," ReversingLabs engineer Karlo Zanki said.

"In practical terms, this means HIVE is scaling production of Bitcoin much like a growth business scales output of a core product," he wrote. "Each incremental exahash increases daily production and revenue potential, while our HPC division provides a complementary revenue stream that grows with demand for compute power. "

That said, Grok 4 is an insights tool, not a safety net. Recent incidents around moderation and response behavior mean you must validate outputs with independent sources. That's why you should ideally treat Grok 4 as a rapid investigator, not as the final arbiter.
