The company's board of directors approved the plan, which will see it acquire up to \$5 million of the two assets in total over the next year, according to a company announcement on Thursday.

Elon Musk's aerospace company SpaceX moved \$257 million worth of Bitcoin, its second large-scale transfer in three months, prompting speculation about a potential sale as the company faces mounting financial and political pressure.

In traditional markets, clearing and settlement are often invisible to end-users, but they're where the real leverage is. Tempo would give Stripe a chain purpose-built

for predictable fees, deterministic settlement times, and merchant distribution that nobody else can match. This is 20 years of payment-processor muscle memory applied to crypto rails.

The stated objective for the models is to maximize their risk-adjusted returns. The rules emphasize autonomy, requiring each AI to independently generate its trading ideas, size and time its trades, and manage its own risk, with all model outputs and corresponding trades made public for transparency.

Traders who wait for confirmation look for above-average volume and a strong candle close to validate the move. Without those signals, the risk of a trap rises sharply.

He received some support, including from Solana co-founder Raj Gokal and former Solana Foundation head of strategy Austin Federa, who both suggested that Polygon “team up” with Solana or become a layer 2 on the Ethereum-rival network.
