Comprehensive Guide to trade on binance smart chain

A Pump.fun livestreaming duo made \$49,000 in crypto token creator fees while one member got slapped by fitness influencer Bradley Martyn after attempting to steal his hat—something he notoriously hates.

Not all chatbots managed to generate a profit, with OpenAI's ChatGPT 5 seeing an unrealized loss of about \$2,800, while Google's Gemini 2.5 Pro had amassed \$3,270 in unrealized losses at the time of writing.

In 2017 and 2018, Kobayashi earned the nickname "Tokyo Whale" for selling Mt. Gox Bitcoin to fund fiat repayments. In mid-2024, wallet activity surged again as

roughly 100,000 BTC was moved between Mt. Gox addresses for distribution, though not all represented actual sales.

The clues lie in leverage and positioning. When funding rates in perpetual futures turn strongly positive or negative, it signals crowding on one side of the market. When open interest builds near key levels, it often sets the stage for squeezes in either direction.

Meanwhile, Michael Saylor hinted on Sunday that Strategy may buy more Bitcoin after sharing a chart showing \$69 billion in BTC holdings. Even with equity pullbacks, DAT crypto reserves remain intact, signaling long-term conviction.

The emergence of smart contracts has brought revolutionary breakthroughs to blockchain technology. These self-executing computer programs can automatically trigger corresponding operations when preset conditions are met, without manual intervention. Smart contracts not only improve transaction efficiency but also greatly reduce trust costs. Currently, smart contracts have been widely applied in decentralized finance (DeFi), digital identity authentication, the Internet of Things, and other fields. With the continuous development of technology, the functions of smart contracts will become more powerful, and application scenarios will become more abundant.
