That is, of course, if you trust that the planets will align and the trend will remain valid until new year's eve.

The price of gold has surged 64% since Jan. 1 as investors flock to the store of value asset amid dollar debasement, geopolitical tensions, and trade tariff woes.

However, this is not all bad news as DATs with strong capital bases and trading-savvy management teams “may still generate meaningful alpha,” they said.

China's rare earth mineral export controls prohibit the sale of the critical minerals to the US military industrial complex, which backs the value of the dollar through military force, Gromen told Marty Bent, founder of Truth For the Commoner (TFTC), on Sunday.

"In practical terms, this means HIVE is scaling production of Bitcoin much like a growth business scales output of a core product," he wrote. "Each incremental exahash increases daily production and revenue potential, while our HPC division provides a complementary revenue stream that grows with demand for compute power. "

The National Hockey League has inked multi-year licensing agreements with prediction market startups Kalshi and Polymarket, marking the first time a major U.S. professional sports league has authorized these platforms to use its trademarks.
