Polymarket made big moves this month

Bitcoin's price recently stood at \$108,200, down nearly 3% over the past day, according to crypto markets data provider CoinGecko. BTC hit a new high of \$126,080 at the start of the month before tumbling last week as investors liquidated over \$19 billion in crypto futures positions liquidated.

Shareholders welcomed the strategic expansion, as CleanSpark's stock price rose over 13% on Monday, after rising 140% year-to-date in 2025, according to data from Google Finance.

Why these three? Each has strong brand recognition, decent liquidity and different strengths: BTC as the store-of-value, ETH with its smart contract ecosystem and XRP with fast settlement and cross-border payments. Together, they cover what businesses need: trust, functionality and speed.
