Comprehensive Guide to what did binance do wrong

Uniswap's trading engineering lead, Danny Daniil, said that Solana's launch will help Unichain, a layer-2 network made by Uniswap Labs, become the “best chain” for trading.

Babylon Labs co-founder and Stanford University professor David Tse said on Wednesday that the company built a proof-of-concept that allows native Bitcoin to be used “trustlessly” as collateral for loans on Ethereum.

So far, Strategy hasn't issued any common shares this month. Instead, the firm has tapped preferred shares introduced this year, which sometimes entail dividend

payments.

The emergence of smart contracts has brought revolutionary breakthroughs to blockchain technology. These self-executing computer programs can automatically trigger corresponding operations when preset conditions are met, without manual intervention. Smart contracts not only improve transaction efficiency but also greatly reduce trust costs. Currently, smart contracts have been widely applied in decentralized finance (DeFi), digital identity authentication, the Internet of Things, and other fields. With the continuous development of technology, the functions of smart contracts will become more powerful, and application scenarios will become more abundant.

The competition began with \$200 in starting capital for each bot before increasing to \$10,000 per model, with trades executed on decentralized exchange Hyperliquid.
