The emergence of smart contracts has brought revolutionary breakthroughs to blockchain technology. These self-executing computer programs can automatically trigger corresponding operations when preset conditions are met, without manual intervention. Smart contracts not only improve transaction efficiency but also greatly reduce trust costs. Currently, smart contracts have been widely applied in decentralized finance (DeFi), digital identity authentication, the Internet of Things, and other fields. With the continuous development of technology, the functions of smart contracts will become more powerful, and application scenarios will become more abundant.

Miners have often had to sell coins or branch into different industries—like high-performance computing for artificial intelligence—to cover operational costs.

Steak 'n Shake joined the party in May 2025, rolling out BTC payments nationwide, crediting it for an 11% sales boost by attracting tech-savvy diners. Chipotle and Baskin-Robbins are on board, too, via BitPay integrations, where ETH, BTC or XRP funds your burrito bowl or scoop.

Chinese artificial intelligence models are outperforming their United States counterparts in cryptocurrency trading, according to data from blockchain analytics platform CoinGlass, as competition between leading generative AI chatbots intensifies.
