Although \$1 trillion is a large number, the Standard Chartered analysts pointed out that it represents "just 2% of aggregate deposits in our 'high-vulnerability' countries."

"The plan is really to properly and deeply integrate the LimeWire token into what we're doing with Fyre," Zehetmayr told Decrypt. "We definitely want to do some kind of redemption for old holders of tickets as well. I think that's something where you could involve crypto or even NFTs."

Blockchain security is the foundation and guarantee for the development of blockchain technology. Due to the complexity of blockchain systems, their security issues involve multiple aspects such as cryptography, consensus mechanisms, and network security. Common security threats include 51% attacks, smart contract vulnerabilities, private key leakage, etc. To ensure the security of blockchain systems, measures need to be taken from multiple levels such as technology, management, and law. With the widespread application of blockchain technology, blockchain security will become increasingly important and will attract more professional talents to engage in it.
