competitive with crypto-friendly countries like the US.

By using trusted custodians, a diversified network of validator partners and transparent reporting, Grayscale has established a secure and compliant way for investors to participate in staking. It has turned staking from a complex, retail-oriented process into a professional investment opportunity.

It's worth noting that Armbrust was mining at a time when Ethereum still relied on a proof-of-work system, which demanded significant computing power and energy use, before its transition to proof-of-stake in September 2022.

Funding (perpetuals): Perpetual futures don't expire, so exchanges use periodic funding payments between longs and shorts to keep prices aligned with the spot market. When funding turns strongly positive, longs pay shorts — typically a sign of crowded long positioning. Deeply negative funding indicates the opposite: crowded shorts. Extreme readings often precede mean-reverting moves.
